

Connecting Mint: Budget Tracker & Planner

WYHY DIGITAL: ONLINE & MOBILE BANKING

Mint is a free financial app for individual users that combines bank accounts, credit cards, bills and investments in a single location to monitor spending, set savings goals, and track bills.

Because data related to Mint is stored on cloud servers, a manual data update is not required. However, to ensure the fastest update to information, members are asked not to log in to Mint for one week after the launch of WyHy Digital: Online & Mobile Banking (Tuesday, August 25).

If members log in during the week the app launches, they may see error messages and duplicate transactions. To refresh the data manually, uninstall Mint and reinstall it. After logging back in, click the refresh button to update the account.
